

Dust Control

Innovative air-movement solutions, engineered by a trusted team with proven experience in dust control applications.

Dust Control Across Industries

- » Agriculture
- » Cement & Sand
- » Mining & Minerals
- » Ethanol Production
- » Fertiliser Production
- » Metal & Machining
- » Pharmaceutical
- » Power Generation
- » Wood, Paper & Pulp
- » Food Processing
- » Chemical Processing
- » Recycling

Who We Are

AirEng is a market leader in industrial fans and blowers.

Over the last 30 years, we have gone from strength to strength in designing and manufacturing the best quality, Australian made, industrial air-movement products, for distribution around the world.

Trusted by Global Leaders

Trusted by global leaders and market-leading OEMs, AirEng supplies reliable, high-performance industrial fans and blowers for dust control applications across a range of industries.

Our industrial dust control air-movement solutions capture and manage airborne emissions through carefully engineered airflow, ensuring clean, safe, and efficient working environments.

Whether moving air through filters, process scrubbers, or other capture systems, AirEng industrial fans and blowers are built for continuous operation and designed to handle corrosive or abrasive particulates with durable, custom construction.

Local Design & Production

With in-house design, testing and manufacturing in Australia, and the backing of the global NYB Group, AirEng provides proven solutions that support efficiency, compliance and long-term performance.

AirEng's talented engineers and designers use leading-edge technology, practical design and robust construction to create air-movement solutions built to last. Our full-circle production facility in Victoria handles fabrication of fans and blowers of any size, with key processes kept in-house to maintain the exceptional quality AirEng is known for locally and internationally. We welcome tours of our facilities to showcase the engineering and craftsmanship that go into every fan or blower we produce.

Dust Control Fans & Blowers

- » Centrifugal Fans
- » Pressure Blowers
- » Silencers and Acoustic Components
- » Flow Control Devices
- » Customised Components
