

Mining

Innovative air-movement solutions, engineered by a trusted team with proven experience in the mining industry.

Mining Industry Applications

- » Mine & Tunnel Ventilation
- » Pollution Control
- » Material Conveying

Who We Are

AirEng is a market leader in industrial fans and blowers.

Over the last 30 years, we have gone from strength to strength in designing and manufacturing the best quality, Australian made, industrial air-movement products, for distribution around the world.

Trusted by Global Leaders

AirEng is trusted by global leaders in the mining industry to deliver reliable, high-performance air-movement equipment for the processes that matter most.

From mine ventilation and motor cooling to ore processing and material handling, our custom-engineered fans and blowers are built to withstand the harsh, continuous demands of mining operations.

With solutions for primary, secondary, and auxiliary ventilation systems, as well as dragline cooler fans, silencers, and flow control devices, AirEng delivers reliable, high-performance airflow tailored to every mining application.

Local Design & Production

With in-house design, testing and manufacturing in Australia, and the backing of the global NYB Group, AirEng provides proven solutions that support efficiency, compliance and long-term performance.

AirEng's talented engineers and designers use leading-edge technology, practical design and robust construction to create air-movement solutions built to last. Our full-circle production facility in Victoria handles fabrication of fans and blowers of any size, with key processes kept in-house to maintain the exceptional quality AirEng is known for locally and internationally. We welcome tours of our facilities to showcase the engineering and craftsmanship that go into every fan or blower we produce.

Mining Range of Fans & Blowers

- » Axial Fans
- » Centrifugal Fans
- » Booster Fans
- » Silencers and Acoustic Components
- » Flow Control Devices
- » Customised Components
