

Waste & Recycling

Innovative air movement solutions, engineered by a trusted team with proven experience in the waste and recycling industry.

Waste & Recycling Industry Applications

- » Cooling Towers
- » Forced Draft
- » Induced Draft
- » Dilution Air
- » Process Control
- » General Ventilation

Who We Are

AirEng is a market leader in industrial fans and blowers.

Over the last 30 years, we have gone from strength to strength in designing and manufacturing the best quality, Australian made, industrial air-movement products, for distribution around the world.

Trusted by Global Leaders

AirEng is trusted by global leaders in the recycling industry to deliver reliable, high-performance air movement equipment for the processes that matter most.

From odour control and emissions management to pneumatic conveying and material separation, our custom-engineered fans and blowers are built to handle the harsh, continuous demands of recycling operations.

With in-house design, testing and manufacturing in Australia, and the backing of the global NYB Group, AirEng provides proven solutions that support efficiency, compliance and long-term performance.

Local Design & Production

AirEng's talented engineers and designers use leading-edge technology, practical design and robust construction to create air movement solutions built to last. Our full-circle production facility in Victoria handles fabrication of fans and blowers of any size, with key processes kept in-house to maintain the exceptional quality AirEng is known for locally and internationally. We welcome tours of our facilities to showcase the engineering and craftsmanship that go into every fan or blower we produce.

AirEng Range of Fans & Blowers

- » Centrifugal Fans
- » Axial Fans
- » Mixed Flow Fans
- » Flow Control Devices
- » Silencers and Sound Attenuation Products
- » Side Channel Blowers
- » Fan Accessories
